

COMETS ALA 19TH C.
 (1811, 1835, 1843, 1858 - 2 poses, 1861, 1882):
 If Mimbrenos and Puebloans saw Great Comets like these in the 9th - 12th centuries, how could they have failed to record them?

And, if we possibly have a Cornucopia of their ancient *comet images* in the American Southwest, why should we fail to comprehend them?
